PROJECT

Large-scale News Graph Mining <ul style="list-style-type: none">• Embedded multi-lingual news articles with sentence-bert neural network and ridge regression.• Extracted name entities with Spacy and Polyglot; bridged multilingual name entities through Wikipedia concepts.• Query, filter, and refine similar news article pairs based on classifiers with similarity evaluation.
Personalized Opinion Graph Time Series Learning <ul style="list-style-type: none">• Modeled the dynamics of opinions and personalities with probabilistic graph time series.• Devised an extended EM algorithm for learning the graph time series and get competitive performance.
