- Enabled rigorous cross-model comparison through unified metrics and analysis workflows.
- Generated evaluation insights to inform model selection and training roadmap decisions.

### **Efficient Cluster-wise LLM Judge for Event Identifications from Poll** (10x data efficiency)

- Designed a cluster-aware active learning framework to detect temporal events from X poll texts.
- Modeled the evolution of social discourse by graph-based topic tracking and statistical analysis.

### **Global Multilingual News Graph Learning with Transformers**

- Devised a global news retrieval system, generating trillion-scale relations with dense embeddings and indexing.
- Built rank models for similar multilingual news using rules-based and active learning classifiers.
