EDUCATION

University of Massachusetts Amherst • PhD in Computer Science (GPA: 3.9/4)	Amherst, MA 2019-2025
Central South University • B.E. in Computer Science (GPA: 3.9/4)	Changsha, China 2014-2018

EXPERIENCE

Pretraining & Scaling – Amazon AGI Foundations Applied Scientist • Optimized pre- and mid-training recipes by scaling law for Amazon’s base models (hundreds B parameters). • Diversified reasoning path by contrastive learning and self-supervised token-efficient curriculum for mid-training. • Unified datamix within a framework that stabilizes adaptive attention and distribution-constrained optimization. • Refined and standardized evaluations across frontier foundation models with shot/prompt sensitivity analysis.	Sunnyvale, CA 2025.7 - present
---	--

Amazon AGI Foundations Applied Scientist Intern • Applied parameter efficient LLM training with Quantized LoRA for scalable model adaptation. • Devised a model merging framework by distilling activation to accelerate multi-task LLM learning schedule. • Implemented adaptive online learning with sample re-weighting for continuous LLM improvement.	Seattle, WA 2024.7 - 2024.10
--	--

University of Massachusetts Amherst Research Assistant • Designed an efficient cluster-aware LLM judge framework for online event extractions from temporal graph. • Zero-shot learning on LLM with an event retrieval pipeline from global multilingual news database. • Built a SOTA transformer-based global news graph with trillions of edges for event detection, recommendation. • Developed the largest multilingual news similarity dataset, using active learning for retrieval and ranking.	Amherst, MA 2019.9 - 2025.6
---	---------------------------------------

Z.AI Research Scientist • Modeled the dynamics of opinions and personalities with probabilistic graph time series. • Devised an extended EM algorithm for learning the graph time series and get competitive performance. • Searched and rank scholars with heterogeneous random forest (deployed on prestigious AI platform Aminer). • Clustered and visualize temporal scientific topics with refined genetic algorithm.	Beijing, China 2017.6 - 2018.12
--	---

PROJECT

Nova Foundation Model Training Optimization • Optimized pre&mid-training recipes for Amazon’s Nova base models, supporting official production release. • Designed efficient TB-scale data preparation pipelines to support high-throughput generation. • Analyzed training dynamics and failure modes through ablations of hyperparameters and data mixtures.	(Artificial Analysis Intelligence Index: 62)
---	---

Reasoning Path Diversification in Mid-Trainin • Rewrote noisy webcrawl data with LLM judge to summarize reasoning information. • Designed contrastive knowledge distillation strategies to generate diversified reasoning data. • Quantified data reasoning depth with Essential-web classifier to optimize mid-training recipe.	(+16% coding performance)
---	----------------------------------

Merge LLM with Online Activation Alignment • Parameter-efficient fine-tuning with data mixing and target evaluation for domain expert models. • Developed an activation alignment framework to merge LLMs across diverse tasks (math, coding, medical). • Adapted activation weight for LLM online learning during parameter-efficient training and sampling.	(+10% math performance)
--	--------------------------------

Cross-Model Evaluation and Benchmarking Framework • Standardized evaluations across frontier foundation models with shot/prompt robustness check.	(Aligned up to 17% evaluation gap)
--	---

- Enabled rigorous cross-model comparison through unified metrics and analysis workflows.
- Generated evaluation insights to inform model selection and training roadmap decisions.

Efficient Cluster-wise LLM Judge for Event Identifications from Poll (10x data efficiency)

- Designed a cluster-aware active learning framework to detect temporal events from X poll texts.
- Modeled the evolution of social discourse by graph-based topic tracking and statistical analysis.

Global Multilingual News Graph Learning with Transformers

- Devised a global news retrieval system, generating trillion-scale relations with dense embeddings and indexing.
- Built rank models for similar multilingual news using rules-based and active learning classifiers.

SELECTED PUBLICATION

Amazon Nova 2: Multimodal reasoning and generation models

Amazon AGI Foundations. Technique Report. 2025.

Adaptive Activation Alignment for Model Merging

Xi Chen, Akshaya Shanbhogue, Yue Zhang. To appear.

Identifying and Investigating Global News Coverage of Critical Events Such as Disasters and Terrorist Attacks

Xi Chen*, Erica Cai*, Reagan Keeney, Ethan Zuckerman, Brendan O’connor, Przemyslaw Grabowicz. International AAAI Conference on Web and Social Media (ICWSM), 2025.

Efficient Cluster-aware Large Language Model Learning for Event Identification from Social Polls

Xi Chen, Mayank Bumb, Vishal Kalakonnar, Przemyslaw Grabowicz. To appear, 2025.

Global News Synchrony and Diversity During the Start of the COVID-19 Pandemic

Xi Chen, Scott Hale, David Jurgens, Mattia Samory, Ethan Zuckerman, Przemyslaw Grabowicz. International World Wide Web Conference (The Webconf), 2024.

A Multilingual Similarity Dataset for News Article Frame

Xi Chen, Scott Hale, David Jurgens, Mattia Samory, Przemyslaw Grabowicz. International AAAI Conference on Web and Social Media (ICWSM), 2023.

Multilingual News Article Similarity

Xi Chen, Ali Zeynali, Chico Camargo, Fabian Flock, Devin Gaffney, Przemyslaw Grabowicz, Scott Hale, David Jurgens, Mattia Samory. International Workshop on Semantic Evaluation @ NAACL, 2022.

SKILL

LLM: Pre&mid-training, Parameter-efficient fine-tuning, Model merging, RLHF, Retrieval-augmented generation(RAG).

Search & Retrieval: News similarity search, Transformer-based retrieval models, Semantic indexing.

Recommendation Systems: Graph modeling, Active learning for ranking, Multilingual content recommendations.

Machine Learning & Optimization: Event detection, Time-series analysis, Probabilistic modeling.

SERVICE

Program Member:

- NAACL(2023)
- ICWSM(2023, 2024, 2025, 2026)
- SEMEVAL (2022, 2023, 2024)
- IC2S2 (2022, 2023, 2024, 2025)

HONOR

NSF Student Travel Award, 2024

UMass CICS best portfolio finalist, 2023.

Nomination for Chinese Exceptional Student (1/6500 ISchool undergrads and grads), 2018.

Ranked global Top50 of Autochess players (50/millions, a world-class strategy game for playing DOTA on chesstable).
